

Herakulix® Max

CARRIES THE BURDEN OF YOUR CLT WORLD ON HIS SHOULDERS

Combined support options are possible

As a load-bearing system, the Herakulix® Max supports point-supported ceiling systems of any size.

- **Application:** Ideal for multi-storey CLT buildings.
- **Stability:** The integrated steel core prevents lateral compression failure and optimises vertical load transfer
- **Technology:** 30-degree drill holes in the base and head plates enable an angled screw path for optimum force transmission in all directions
- **Decoupling:** optionally available with the corresponding Herakulix® Max decoupling profile

THE BENEFITS AT A GLANCE:

- ✓ seamless connection solution for **columns at ceiling level** in multi-storey CLT buildings
- ✓ enables a **point-supported ceiling system**
- ✓ optimises **vertical force transfer** between the columns
- ✓ reduces the need for additional beams/cross-beams
- ✓ **saves labour and reduces material requirements**
