

KompeFix® II KF

SIHGA® Feature	YOUR Benefit
universal, constructive wood protection for terraces with height 8 mm and width 21 mm	creates distance between the woods; thereby allowing them to breathe and increasing their lifespan
developed, patented and made in Austria	local quality, experience from more than 14 years of terrace construction included
the 4.5 metre long roll is simply rolled out	fast and easy, can be fixed as desired (screwable) and cut to length
helps to seal the screw	increases the service life of the construction
the pre-load effect integrated through the specific shape compensates for the swelling and shrinkage of the timber	enhances walking comfort on the terrace
monitored production from polyvinyl chloride, with a special recipe	remains permanently dimensionally stable, is heat-, frost- and UV-resistant
quantity calculation per m²	1 : distance substructure [m] : 4.5
includes installation instructions	is time-saving and enclosed for practicality
HFA inspected in combination with TeFix®	for details please see page 66
